MiMIND Project Reaches Mid-Term Milestone with Pilot Evaluation in Romania

23–25 September 2026 | Brașov, Sfântu Gheorghe and Micfalău, Romania

The MiMIND project is reaching an important mid-term milestone with a three-day pilot evaluation workshop taking place in Romania from 23 to 25 September 2026.

The event brings together project partners to review progress, exchange experiences and assess the implementation of the MiMIND pilots in Hungary, Romania and Ukraine. The programme combines project evaluation sessions with field visits, providing an opportunity to connect project results with the realities faced by vulnerable communities.

As part of the programme, participants will visit the SAMR Brașov Branch and two vulnerable communities in Sfântu Gheorghe, including the Őrkő community and a local night shelter. The pilot partners will also present their experiences and initial findings, while dedicated sessions will review project management, communication, best practices and opportunities for further cooperation.

The workshop will also include a presentation by the Union of Ukrainians in Romania, offering an important perspective on the needs and experiences of Ukrainian communities in Romania.

The mid-term evaluation will help the MiMIND consortium identify lessons learned, address emerging challenges and further strengthen the implementation of the project during its second half.

MiMIND – Mental Health and Migration: Innovative approaches for vulnerable populations is an EU-funded project supporting better mental health and psychosocial support for vulnerable migrant and displaced populations through practical approaches, pilot actions and cooperation between health and social-sector actors.

Funded by the European Union
